Created from the excellence of Italian design, the Newent sofa becomes the latest part of the Bentley Home collection, a luxury brand synonymous with exquisite craftsmanship and innovation.

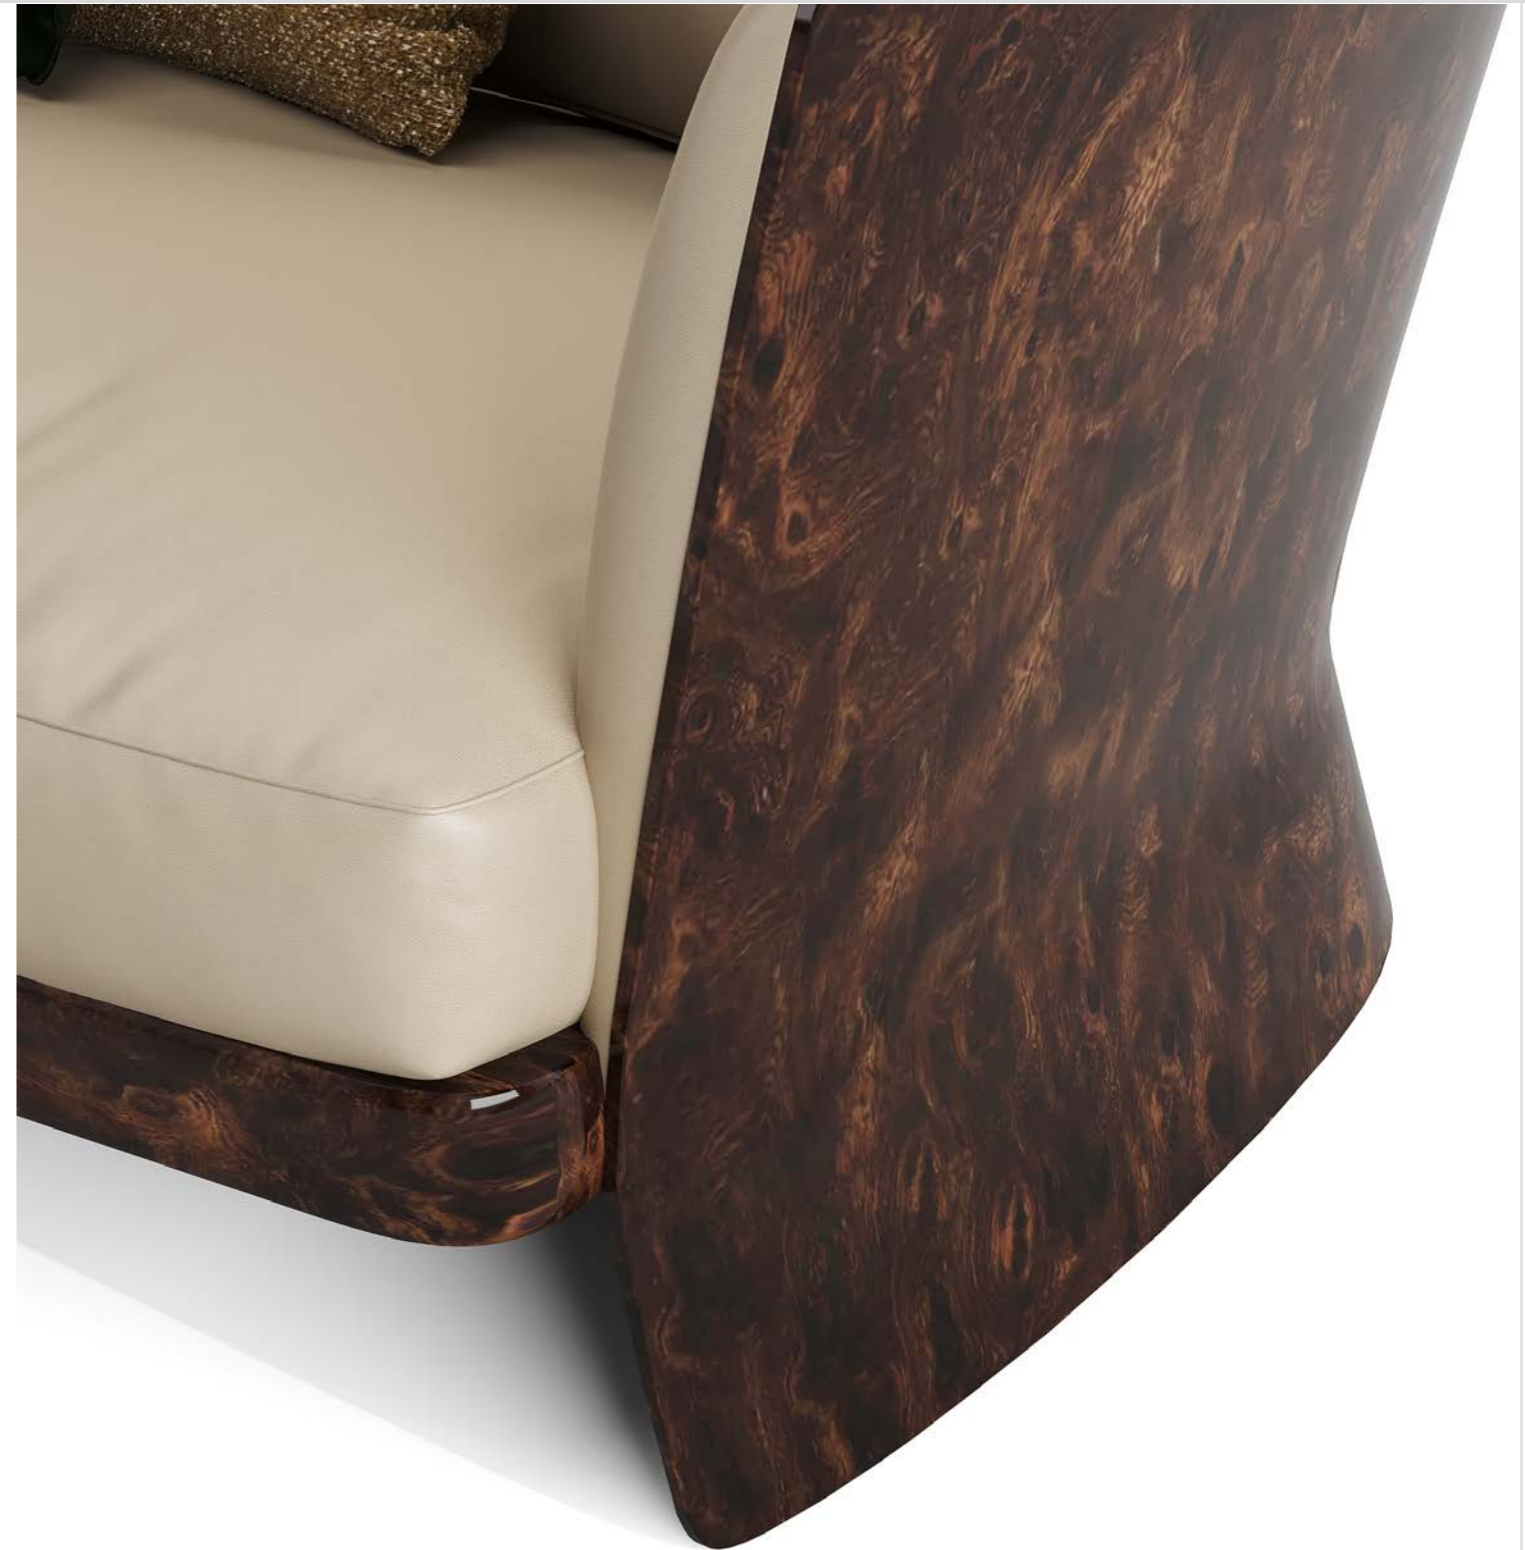

The comfort and harmony of shapes, as well as the expressive silhouettes of the collection, are the key features of the Newent line. The external frame, displayed in the most prestigious and iconic Burr Walnut veneer, envelops the curved profile of the sofa, outlining changes in angle that enhance its elegance and tapered shape.

- Bending moulds made specifically for this design
- Special thermoforming obtained with innovative processes and materials
- Hand-inlaid veneer positioned with a hot-vacuum membrane press
- Special double curve visible in the lower part, without presenting divisions and joints between the parts curved in different directions
- Seat cushions padded with fiberfill polyurethane and mixed down, mixed down back cushions
- Fine essences such as Burr Walnut and Smoked Liquidambar glossy finish or Smoked Liquidambar open pore matt finish, alternative version entirely covered in leather or fabric

## OPTIONAL

- 1 - embroidered logo
- 2 - diamond quilting on the external frame

DIVIDER

Smoked Glass with ROYAL DIAMOND DESIGN

The new Eastwood bookshelf, the soul of Bentley Home codes expressed in all the details.

From the curved shape of the internal vertical structure, to the rounded corners, to the Royal Diamond engraved in the glass dividers, this bookshelf evokes the Bentley codes: sophisticated and elegance.

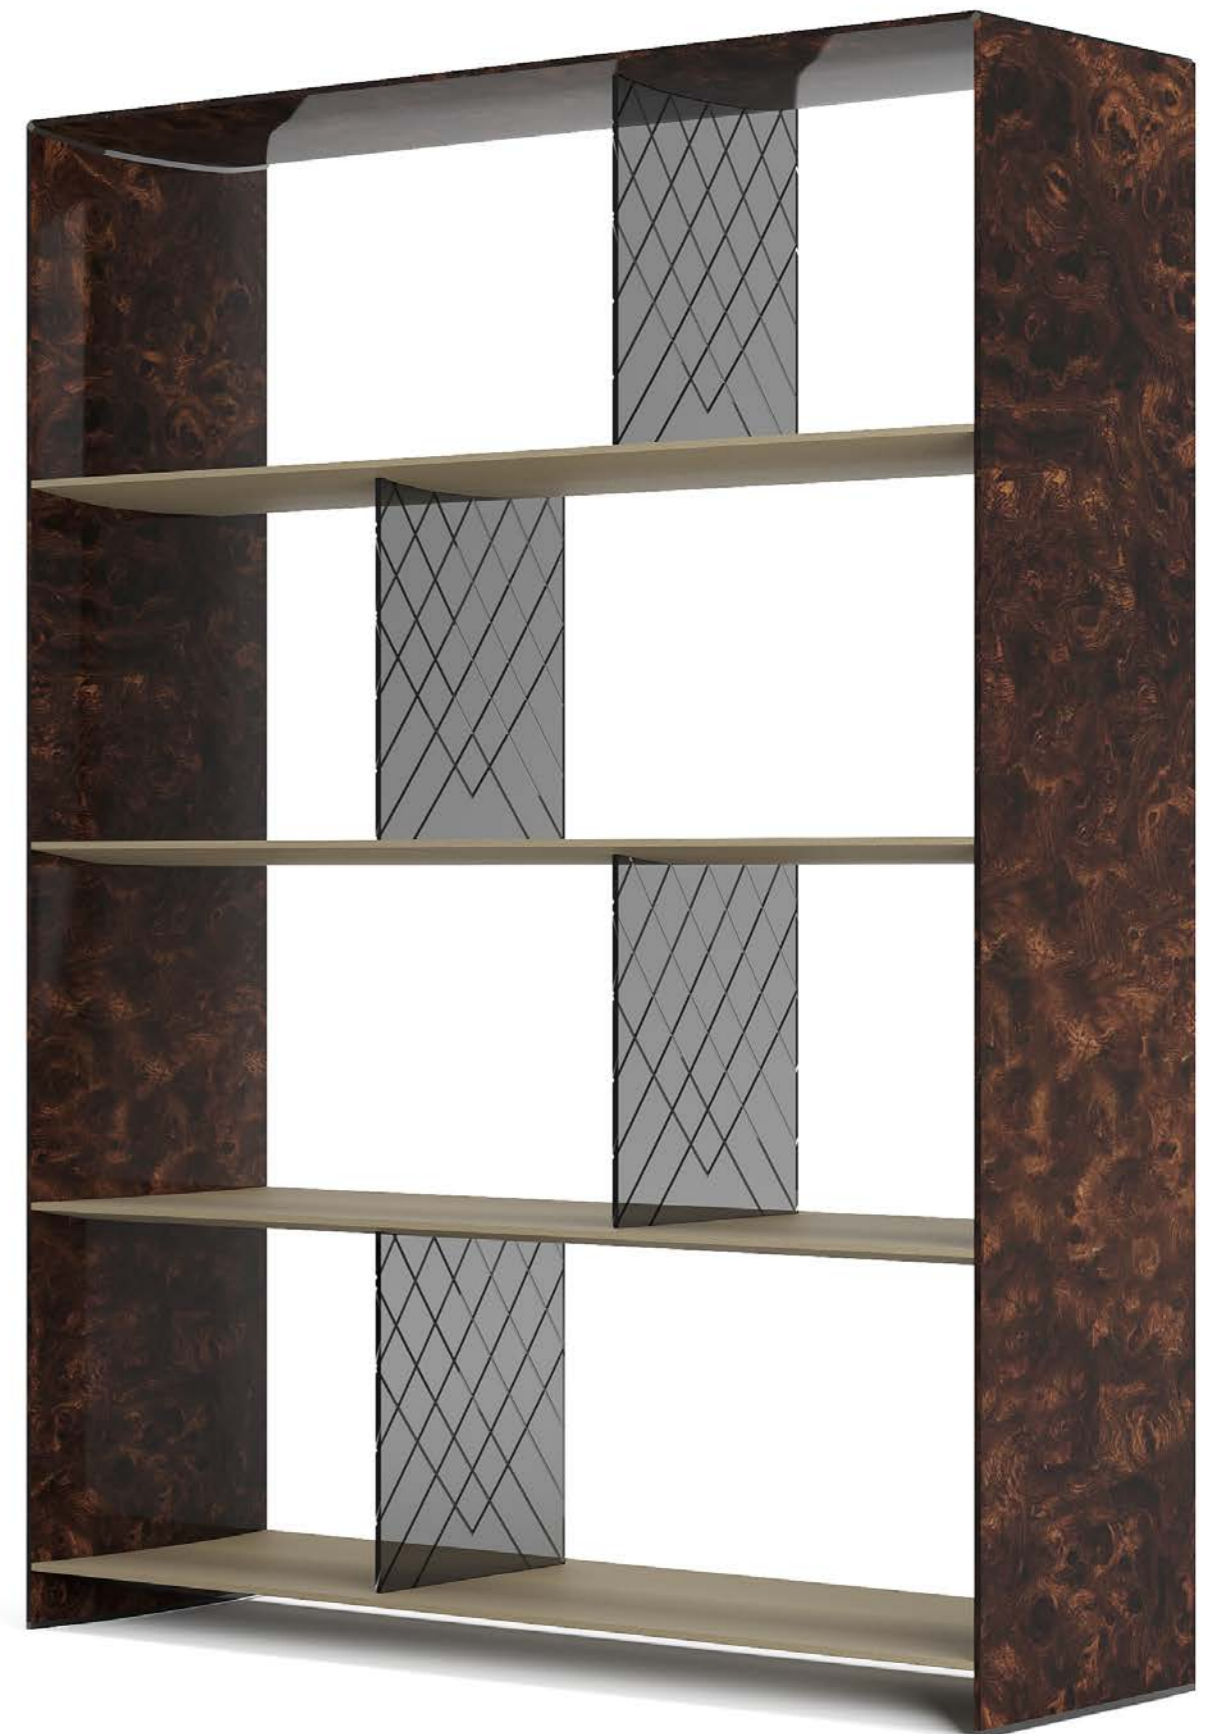

Precious hand-inlaid essences or leathers from the Bentley Home collection, the Eastwood bookshelf is finished front and back, allowing it to be used as a wall bookshelf or in the middle of the room, allowing you to create Bentley's life style in any environment.

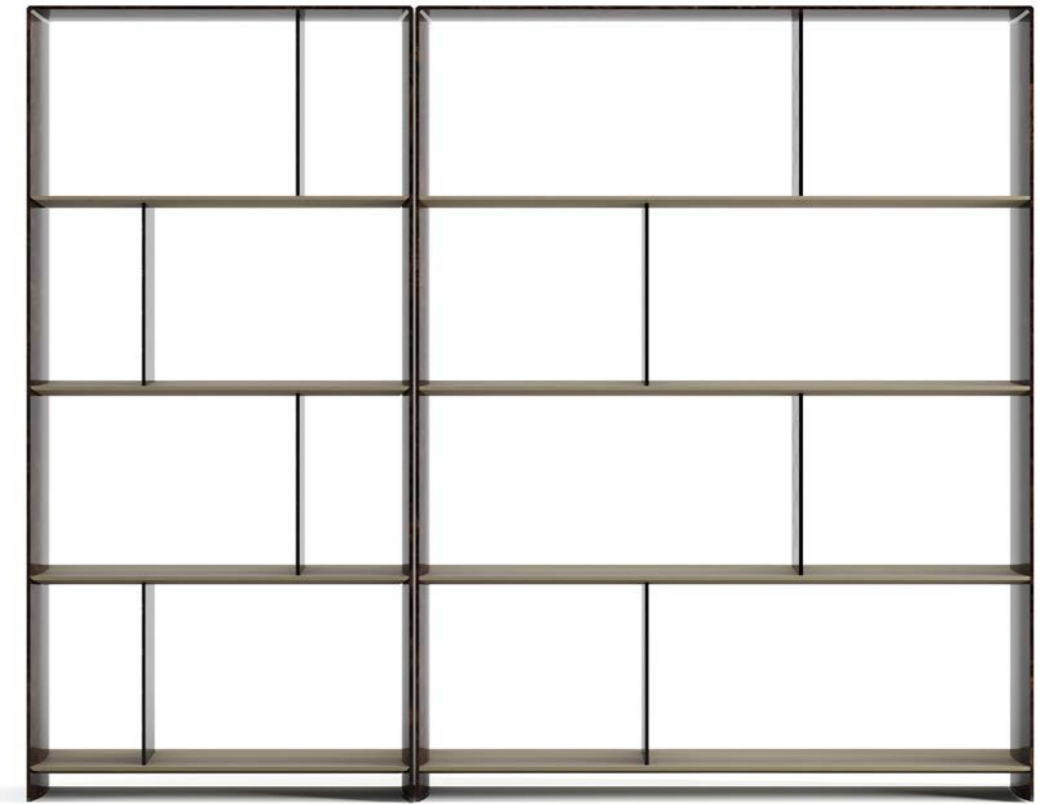

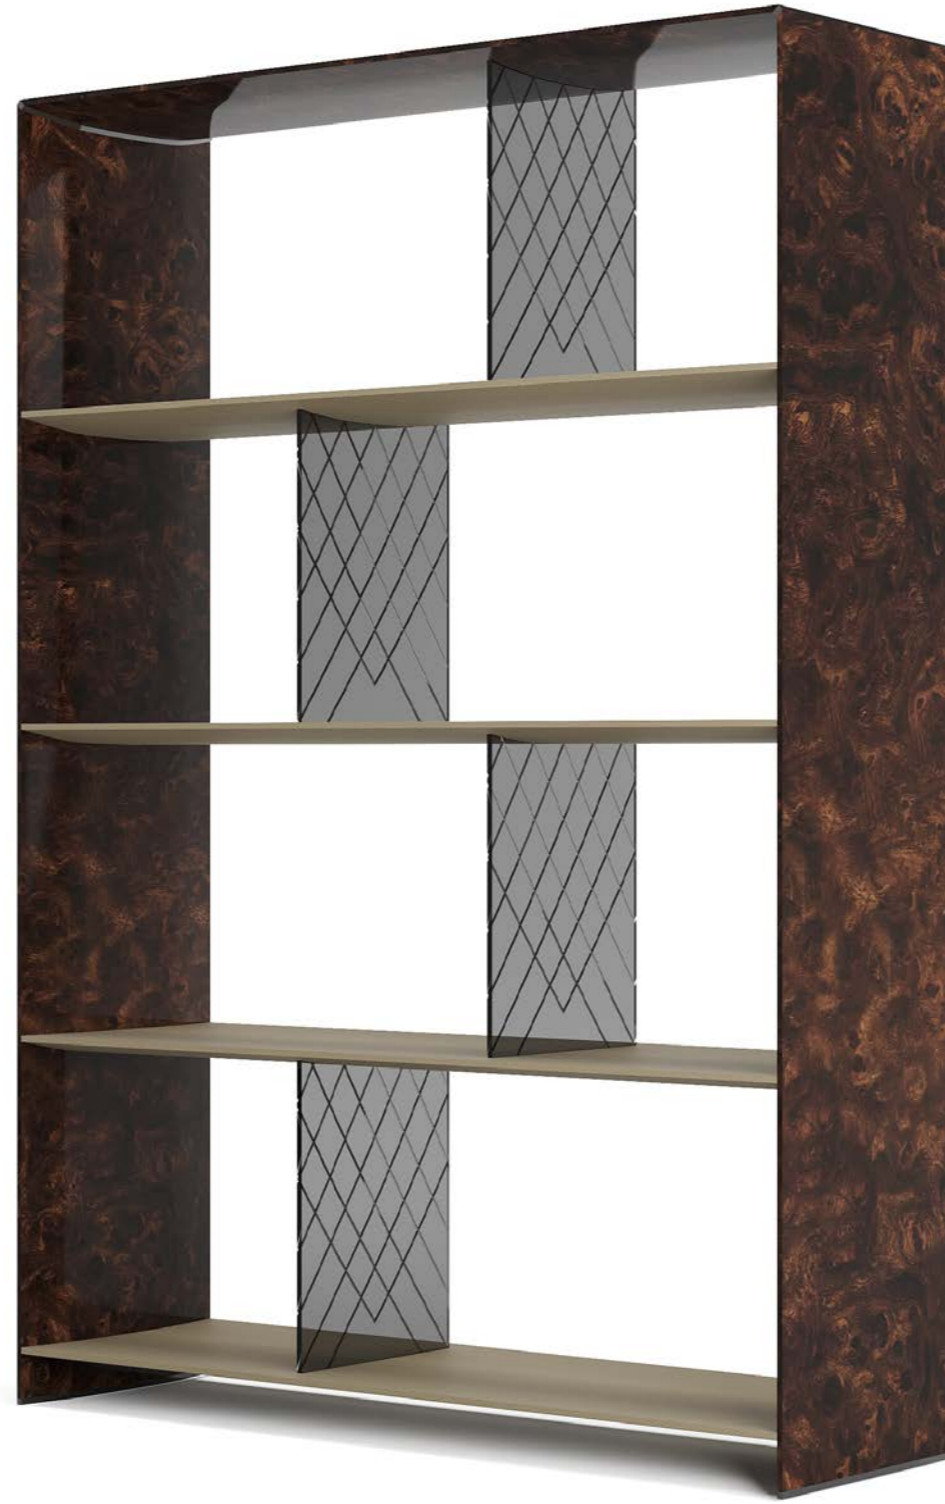

- Elements shaped with 5-axis CNC machines
- For the wood versions, the veneer is inlaid by hand and positioned with a hot-vacuum membrane press for perfect positioning
- The bookcase's structure is created by the section of wooden panels that comprise it: curved on one side and flat on the other, refined at the ends
- Gun metal details on the feet, with longitudinal cut of the steel plate, and between shoulders and top, with a shaped cut inclined at 45°
- Fine essences such as Burr Walnut and Chestnut burl, or Warm Grey Fiddleback Sycamore, Toffee Brown Smoked Larch, Smoked Liquidambar glossy finish or Smoked Liquidambar matt finish
- alternative version entirely covered in Vermont leather

#### OPTIONAL

- 1 - nr.4 Smoked glass dividers, tempered and engraved with royal diamond design.

In the new Ridley chair we find all the codes of elegance and lightness of the Bentley Home language.

The “S” shape of the main structure transforms itself along its path, starting from the bottom as a base it evolves into a seat and into a backrest, giving this product a unique design. The lightness is emphasized by the beveled cut of the frame, which evokes the thin and aerodynamic lines that have always distinguished Bentley.

In all Bentley Home products, the design is strengthened by the construction techniques. For the wood versions, high craftsmanship techniques are used.

- The chair is composed of two elements in curved and shaped wood: an “S” element with a complex curvature on 3 axes, always rubber-lined on the front surface; the second element is the rear foot, curved on 2 axes with opposing curves
- Specially made curved moulds
- Hand-inlaid veneer positioned with high-frequency moulds
- The perimeter of the structure is sectioned, inclined and veneered entirely by hand
- The padding is made of shaped high-density polyurethane foam
- Fine Chestnut or BurrWalnut burl essences, or in the WarmGrey FiddlebackSycamore, Toffee Brown Smoked Larch or Smoked Liquidambar essences, brushed glossy finish, alternative version entirely covered in leather or fabric

#### OPTIONAL

- 1 - embroidered logo on the front of the backrest
- 2 - inlaid logo on the backrest in the Burr Walnut version

The Swan wants to take the twist challenge into the Bentley Home collection.

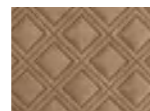

Inspiration deriving from the Butterfly sofa, this iconic shape, which refers to the lines of the automotive flaps, flows along the entire perimeter of the frame, then expands outwards near the armrest, recalling the "Wings", the emblem of the English car manufacturer.

The twist represents not only a recognizable and iconic design, but also a technical construction challenge. In order to obtain the desired twist, we resorted to exclusive molds and manufacturing techniques for this product.

- Bending moulds made specifically for this design
- Twisted structure obtained through differentiated and opposed rays using the classic high-frequency wood bending technique
- The curved elements are then joined with the backrest and framed/shaped with 5-axis CNC machines
- The seat is padded with differentiated density polyurethanes and equipped with braided elastic belts

#### OPTIONAL

- 1 - embroidered logo
- 2 - square diamond quilting on the external frame

Maine Extra  
200 Stone

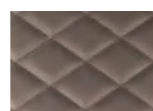

Created from the excellence of Italian design, the Newent night bed becomes the latest part of the Bentley Home collection, a luxury brand synonymous with exquisite craftsmanship and innovation.

The comfort and harmony of shapes, as well as the expressive silhouettes of the collection, are the key features of the Newent line. The external frame, displayed in the most prestigious and iconic Burr Walnut veneer, envelops the curved profile of the sofa, outlining changes in angle that enhance its elegance and tapered shape.

- Bending moulds made specifically for this design
- Special thermoforming obtained with innovative processes and materials
- Hand-inlaid veneer positioned with a hot-vacuum membrane press
- Special double curve visible in the lower part, without presenting divisions and joints between the parts curved in different directions
- Fine essences Burr Walnut and Smoked Liquidambar brushed glossy finish or Smoked Liquidambar open pore matt finish, alternative version entirely covered in leather or fabric

## OPTIONAL

- 1 - embroidered logo on the front of the headboard
- 2-3 - diamond quilting on the external and/or internal structure
- 4 - gun metal profile in headboard frame
