CITY

# 01 PROFILE

"Goodeng Machine" was established in May 2002, is a national high-tech enterprise engaged in R&D, production, sales and service of trenchless machinery, piling machinery, mining machinery, the main products are GS series of horizontal directional drilling machine, GPY series of static pile driver, GM series of surface drilling machine and accessories.

In 2012, "Goodeng Machine" was identified as "National High-tech Enterprise", and successfully got the acceptance and achievement appraisal of the project named "Research on Key Technologies and Product Development of Heavy-duty intelligent trenchless directional drilling rig". The company R&D center was recognized as China Machine Engineering Technology Research Center, many products have obtained the mechanical industry science and technology progress awards from national and provincial government. In 2018, "GOODENG" won the "China Well-known Trademark".

In 2022, the company was in the directory of listing cultivation plan for Jiangsu Technology Enterprise. The first "Goodeng Machine" overseas manufacturing base broke ground in Thailand in the same year, covering an area of nearly 80000 m<sup>2</sup>. The company also has two manufacturing bases in China, covering an area of more than 150000 m<sup>2</sup>, with more than 500 employees, a number of modern intelligent production lines, which can provide 3,000 sets various types of machinery per year. "Goodeng Machine" products are sold all over the country, and also exported to nearly 30 countries and regions in Asia, Europe, Australia, South America and Africa. "Goodeng Machine" realizes resource sharing and creates greater value for customers through the gradually expanding global marketing branch.

## MEMBER COMPANIES

**JIANGSU GOODENG PILING TECHNOLOGY CO., LTD**  
Focus on the R&D, production and manufacturing of pile machinery.

**MALAYSIAN COMPANY**  
Focus on sales and service in the Southeast Asian market.

**JIANGSU GOODENG MACHINERY PARTS MANUFACTURING CO., LTD.**  
Focus on the manufacture and sales of various construction machinery parts.

**JIANGSU GOODENG HEAVY MACHINERY TECHNOLOGY CO., LTD**

Focus on the R&D, manufacturing of HDD machinery, mining machinery and the marketing of a full range of "Goodeng Machine" products.

**JIANGSU GOODENG HEAVY MACHINERY TECHNOLOGY CO., LTD (SHANGHAI BRANCH)**  
Focus on the sales and service of various construction machinery in global markets.

**THAILAND FACTORY**  
Overseas manufacturing base

**SINGAPORE COMPANY**  
Focus on sales and service in overseas markets.

## CORPORATE SPIRIT

Enterprise mission

**For better city !**

Enterprise vision

**To become a first-class international machinery manufacturing enterprise.**

Enterprise values

**Pursue Efficiency, Encourage Innovation, People-Oriented, Team-Work, Create Value For Customers.**

# COMPANY HONOR

"Goodeng Machine" has three times been recognized as a national high-tech enterprise, and has successively undertaken the National Small and Medium Enterprise Innovation Fund Project, seven provincial-level projects for the major achievements transformation of Jiangsu Province; "Goodeng Machine" has obtained the third prize of China Machinery Industry Science and Technology Award, the third prize of Jiangsu Science and Technology Progress Award, and the special prize of Yancheng Science and Technology Progress Award; "Goodeng Machine" has won the titles of Provincial Service-oriented Manufacturing Enterprise Demonstration Base, National Specialized Special New Little Giant, and Provincial Science and Technology Little Giant, etc.

# 02 HISTORY

# 21 YEARS

2002

"Goodeng Machine" was established in Shanghai.

In the same year, the first static pile driver rolled off the production line.

2006

The first 125T horizontal directional drilling machine rolled off the production line successfully.

The first 280T horizontal directional drilling machine was successfully developed.

2009

The foundation stone was laid for the Jiangsu production base.

The first 800T horizontal directional drilling rig was successfully put into production.

2012

Obtained the identification of "National High-tech Enterprise".

2014

The first self-developed large-scale horizontal directional drilling machine test platform of China was officially put into use.

2018

"Goodeng Machine" won the "China Well-known Trademark"

2020

The first phase of the domestic intelligent manufacturing factory was put into use.

2021

A new generation of static pile driver was successfully developed.

The first surface drilling machine was successfully developed.

2019

The first super-large 1200T horizontal directional drilling machine was delivered to use.

2016

Awarded as "Jiangsu Provincial Engineering Technology Center" by the Jiangsu Provincial Development and Reform Commission.

2022

The first overseas manufacturing base laid a foundation in Thailand.

2004

The first 60T horizontal directional drilling machine rolled off the production line successfully.

2008

The first extra-large 600T horizontal directional drilling machine was successfully developed, and delivered to Sinopec.

# GOODDENG

# R&D STRENGTH

Based on the R&D cooperation between "Goodeng Machine" and the institutes including Mechanical Research Branch of China Academy of Building Research, Tongji University, Changzhou University, Central South University and Southeast University, the company has established the Postgraduate Workstation and the Postdoctoral Innovation Practice Base of Jiangsu Province.

With the concept of "seeking development through innovation" for many years, "Goodeng machine" insists on investing about 5% of annual sales revenue in R&D, introducing and training technical talents in the machinery manufacturing industry. The company R&D center with more than 50 engineers has been rated as the Municipal Engineering Research Center, Provincial Industrial Design Center, Provincial Engineering Technology Center, etc.

# 04 INTELLIGENT PRODUCTION

"Goodeng Machine" focuses on improving quality and efficiency, establishes a flexible assembly line to meet the requirements of multi-variety and small-batch production. Regarding "intelligent manufacturing" as the direction of enterprise development, the company builds an intelligent manufacturing factory with Goodeng characteristics, and strives to become a first-class international machinery manufacturing enterprise by digital production management, intelligent equipment and networked supply chain.

# 05 QUALITY CONTROL

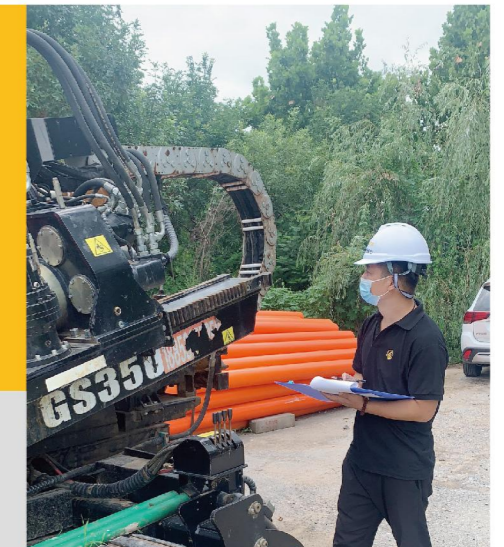

The long-term development of the enterprise is inseparable from excellent product quality. "Goodeng Machine" adheres to the quality management concept of "customer-centered and 'zero defect' as the principle". We regard product quality as the top priority of enterprise development, and pay high attention to quality management. Focusing on the customers' requirements, the company has established a whole process quality management system covering R&D, supply chain, manufacturing and after-sales, formulated a sound quality management and supervision mechanism which guaranteed the effective implementation of quality measures in each link, to provide satisfactory products to customers.

## 06 PRODUCT CENTER

TRENCHLESS MACHINERY

### HORIZONTAL DIRECTIONAL DRILLING MACHINE

Horizontal directional drilling machine is a kind of no-dig machinery. It is widely used in laying various underground public facilities such as telecom, electric power, water supply, sewage, heat, gas and oil pipelines. It can be applied to general clay, soft soil, sand, rock and other strata.

## PIPE THRUSTER

TRENCHLESS MACHINERY

The pipe thruster is the support equipment for HDD machines, mainly used in long-distance and large-diameter pipeline crossing projects for dragging and rescue work.

## MUD PUMP

TRENCHLESS MACHINERY

The independent mud pump station is the supporting equipment for HDD machine construction, which is used to transport drilling fluid to the borehole for hole-wall protection, lubrication and chip removal during the drilling process. Therefore, the drilling and pulling back process can be smoother.

## PILING MACHINERY

# HYDRAULIC STATIC PILE DRIVER

Hydraulic static pile driver is a kind of pile machinery with the features of low noise, low pollution and small impact on the surrounding environment, which is widely used for pile foundation engineering in soft soil area, city center or densely built places, as well as the expansion of precision factory.

MINING MACHINERY

# SURFACE DRILLING MACHINE

Surface drilling machine is a kind of mining machinery which is mainly used in mining, quarrying, construction, civil engineering, building stones and other industries of ultra-deep-hole operation. The aperture range covers  $\Phi$  64-230mm.

06 PRODUCT CENTER

# 07 MARKETING BRANCH

The company has a complete service guarantee system, covering technical support, skills training, equipment maintenance, parts supply, 24 hours rescue and construction support. Over the years, the company has continuously invested in service. On the basis of the layout of marketing branch, relying on the "Goodeng Equipment Management Platform" to achieve remote equipment management, the company is actively expanding the channels of interaction with customers, fully achieving customer requirements, improving customer service experience.

# 08 SOCIAL RESPONSIBILITY

## STAFF

Living and working in peace and contentment is the yearning of Goodeng people for a better life, and it is also the good expectation of "Goodeng Machine" for every employee. Since the establishment of the Employee Care Fund in 2012, the company has allocated special funds every year to carry out internal assistance, care and support activities for employees and their families in need. Starting from the practical problems of employees, the company implements employee care actions, effectively solves the practical difficulties in the daily life of employees, and comprehensively improves the happiness of employees.

LEAD THE FUTURE

## INDUSTRY

"Goodeng Machine" has scientifically solved various problems on the construction site through regular training courses on professional mechanical operation skills, "service long march", and other public welfare projects, and continuously cultivates applied talents for the industry to promote the industry healthy and sustainable development.

## ENVIRONMENT

"Goodeng Machine" actively responds to the national goal of "Carbon peaking and carbon neutrality", has been practicing the responsibility of environmental protection, energy saving, emission reduction, and vigorously develops circular economy. The company is not only committed to reducing the impact of its own operations on the environment, but also actively develops new energy products, effectively providing support for industry customers in energy conservation and emission reduction, and striving to achieve sustainable development of enterprises and society.
